

Gender Equality (SDG 5)

Enhancing Women's Applications, Acceptance, and Engagement in Higher Education

Al-Muthanna University has a dedicated policy within its Access and Participation Plan focused on supporting women's applications, acceptance, and active participation across all levels of university life. This policy sets specific goals and initiatives to ensure equal opportunities and representation for women in every program, with strategies to remove potential barriers that women may face in applying to and engaging with university activities. The university also conducts regular monitoring and reporting to track progress and refine these strategies as needed.

This commitment has yielded notable results: the application and acceptance rates for women at Al-Muthanna University have consistently surpassed those for men, highlighting the success of its efforts to broaden educational access for women. Women at Al-Muthanna University are further encouraged to fully participate in all aspects of university life, including activities, events, and extracurricular programs, fostering an inclusive and supportive environment for their academic and personal growth.
