Tracking and Supporting Women's Access to Higher Education

Al-Muthanna University systematically measures and tracks women's application, acceptance, entry, and study completion rates to monitor gender representation and promote an inclusive educational environment. Female students consistently outnumber male students across all colleges and departments, resulting in higher application, acceptance, entry, and completion rates for women. This trend underscores our commitment to gender equity, providing equitable access to educational opportunities and fostering a supportive environment that encourages academic success for women across all disciplines. Through ongoing data collection and analysis, we continuously work to ensure that women have equal opportunities in higher education at Al-Muthanna University.
